Fall 2020

Instructor: Jayarajan Samuel
Office Room Number: Not Applicable
Email Address: jayarajan.samuel@uta.edu
Office Hours: By email appointment only
Section Information: INSY 5336 / Section 001
Time and Place of Class Meetings: Lectures on Mondays and Wednesdays 5:30 – 6:50 p.m. via Canvas Conferences tool, Exams before November 25th will be held on campus.

Catalog Description: An introductory programming course that teaches students how to solve business problems using the scripting language, Python. Students will be exposed to object-oriented programming concepts, file handling, database access, and graphical user interfaces.

Student Learning Outcomes: Python is a simple yet powerful scripting language that has been growing in popularity. It has been used widely for web development, game programming, general application development, and, more recently, for data analytics. The aim of this course is to acquaint students with the key aspects of the Python language. Upon successful completion of the course, students will be able to:

- apply data structures and programming constructs in the Python language, such as lists, tuples, dictionaries, classes, selection (e.g., if..else), and iteration (e.g., while and for loops), to solve business problems;
- access different file formats (e.g., csv);
- perform basic text analysis; and
- use APIs to access external data.

Required Textbooks and Other Course Materials:

Other Materials/Resources/Readings:
1. Instructor Notes
2. Python for Data Analysis by Wes McKinney
3. https://www.kevinshppard.com/Main_Page
5. Also check out www.coursera.org and www.udacity.com for introductory Python courses

Software: Install Python 3 and Jupyter using the Anaconda Distribution, which includes Python, the Jupyter Notebook, and other commonly used packages for scientific computing and data science. More details will be given in class.

Description of major assignments and examinations:
The distribution of points will be as follows:
Homework Assignments 15%
Exam 1 25%
Exam 2 25%  
Final Exam 25%  
Project 10%  

Grading: The following criteria will be used to assess your grade:  
A (>=90%), B (>=80%), C (>=70%), D (>=60%), F (<60%)  

Final Project: Details will be provided in class and/or Canvas.  

Attendance: At The University of Texas at Arlington, taking attendance is not required. Rather, each faculty member is free to develop his or her own methods of evaluating students’ academic performance, which includes establishing course-specific policies on attendance. As the instructor of this section, I will consider attendance mandatory for all lectures. If you miss a class, you are responsible for the materials covered. All lectures delivered via Canvas Conferences will be recorded. It is expected that students who miss the online lecture would view the recordings at a later time.  

Exams: You are responsible for everything that is covered in the classroom, including additional materials that the instructor may discuss in class. There are no make-up exams. Under extenuating circumstances (e.g., medical emergency, family emergency, work-related travel, etc. with documented evidence), the average score of other exams will replace the one missed exam score. You can only use this excuse for one exam. Every exam will be will cover all content (comprehensive) taught up to that point in the schedule (as described in Course Schedule). Exam1 and Exam2 will be conducted at UTA campus. The final exam will be administered via Canvas Quizzes with Lockdown Browser and camera. It is the student’s responsibility to be equipped to comply to all Canvas Quizzes requirements (Hardware, Software, Internet connection, etc.).  

Homework Assignments: You will have 3 individual homework assignments. You will have about a week to complete the exercises. Homework must be turned in electronically (via Canvas) by the due date and time specified by the instructor. Late submissions will receive a score of 0 (no exceptions).  

Project: You will have one individual project to be completed at the end of the semester. Late submissions will receive a score of 0 (no exceptions).  

Expectations for Out-of-Class Study: Beyond the time required to attend each class meeting, students enrolled in this course should expect to spend at least an additional 9 hours per week of their own time in course-related activities, including reading required materials, completing assignments, and preparing for exams/quizzes.

Instructions on how to access the SFS for this course will be sent directly to each student through MavMail approximately 10 days before the end of the term. Each student’s feedback enters the SFS database anonymously and is aggregated with that of other students enrolled in the course. UT Arlington’s effort to solicit, gather, tabulate, and publish student feedback is required by state law; students are strongly urged to participate. For more information, visit [http://www.uta.edu/sfs](http://www.uta.edu/sfs).

**Final Review Week:** A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week. During this week, classes are held as scheduled. In addition, instructors are not required to limit content to topics that have been previously covered; they may introduce new concepts as appropriate.
