Time and Place of Class Meetings: Monday/Wednesday 1:00-2:20 PM

Description of Course Content: With greater globalization, managers are being increasingly challenged to compete in a global environment. “International Management” seeks to provide you with
the skills, knowledge and sensitivity required to successfully manage organizations and organizational units within a multinational environment. Topics covered include the analysis of environmental forces, the competitive context in which companies operate in global industries, the characteristics of global, multinational and transnational strategies, foreign market entry strategies, cross-border acquisitions and strategic alliances, the role of organizational structures and the importance of strategic control.

The primary objective of this course is to help you think like a manager in the international context-- one who recognizes and understands the important interlinkages that exist in the conducting of business in a global environment. Case studies used in the course will help you develop your analytical and decision making skills and also highlight the reality of environmental uncertainties influencing decision making in the international context. Cases also seek to develop your capacity to identify issues, to reason carefully through various options and improve your ability to manage the organization process by which decisions get formed and executed.

**Student Learning Outcomes:** By the end of the semester you should be able to (1) identify and articulate the challenges faced by managers as they engage in international business, (2) understand the implications of cultural, political, economic and legal differences from the perspective of firms competing in the international context (3) understand the nature of competition in international markets, and (4) distinguish between alternative strategies used by firms to enter foreign markets.
